Bypass list

+ Add bypass

Exempt roles, teams, agents, and apps from this ruleset by adding them to the bypass list.

Bypass list is empty

Target branches

Which branches should be matched?

Branch targeting criteria

Add target

Default

Applies to 1 target: main .

Rules

Which rules should be applied?

Branch rules

☐ Restrict creations

Only allow users with bypass permission to create matching refs.

☐ Restrict updates

Only allow users with bypass permission to update matching refs.

☒ Restrict deletions

Only allow users with bypass permissions to delete matching refs.

☐ Require linear history

Prevent merge commits from being pushed to matching refs.

☐ Require merge queue

Merges must be performed via a merge queue.

☐ Require deployments to succeed

Choose which environments must be successfully deployed to before refs can be pushed into a ref that matches this rule.

☐ Require signed commits

Commits pushed to matching refs must have verified signatures.

☒ Require a pull request before merging

Require all commits be made to a non-target branch and submitted via a pull request before they can be merged.

Hide additional settings ^

Required approvals

1

The number of approving reviews that are required before a pull request can be merged.

☐ Dismiss stale pull request approvals when new commits are pushed

New, reviewable commits pushed will dismiss previous pull request review approvals.

☐ Require review from specific teams

A collection of reviewers and associated file patterns. Each reviewer has a list of file patterns which determine the files that reviewer is required to review.

☐ Require review from Code Owners

Require an approving review in pull requests that modify files that have a designated code owner.

☐ Require approval of the most recent reviewable push

Whether the most recent reviewable push must be approved by someone other than the person who pushed it.

☐ Require conversation resolution before merging

All conversations on code must be resolved before a pull request can be merged.

Allowed merge methods

Merge, Squash, Rebase

When merging pull requests, you can allow any combination of merge commits, squashing, or rebasing. At least one option must be enabled.

☐ Require status checks to pass

Choose which status checks must pass before the ref is updated. When enabled, commits must first be pushed to another ref where the checks pass.

☒ Block force pushes

Prevent users with push access from force pushing to refs.

☐ Require code scanning results

Choose which tools must provide code scanning results before the reference is updated. When configured, code scanning must be enabled and have results for both the commit and the reference being updated.

☐ Require code quality results

Choose which severity levels of code quality results should block pull request merges. When configured, a code quality analysis must be done on the pull request before the changes can be merged.

☐ Automatically request Copilot code review

Request Copilot code review for new pull requests automatically if the author has access to Copilot code review and their premium requests quota has not reached the limit.

Label issues and pull requests for new contributors

Dismiss

Now, GitHub will help potential first-time contributors [discover issues](#) labeled with good first issue
